CHANGES AND LEGAL FIXES LOG

Covers all Xavorian documents, revised October 2026. Her 30 clause edits are applied. Section 12.2 uses your cap: the greater of 70% of fees paid in the last 6 months or ₦50,000.

BEFORE YOU PUBLISH: THINGS ONLY YOU CAN CONFIRM

- Company registration: RC-9912416 is now in the Terms (1.1 and directory), the Privacy Policy, and the directory block of every other document. Check it matches your CAC certificate exactly.
- Hashing: the Privacy Policy now says NIN and BVN are stored only in hashed form. An 11-digit number can be guessed from a plain hash, so use a keyed hash (HMAC with a secret key) to make this true in practice.
- Data Protection Office: the old policy used a Gmail address in some places and legal@xavorian.com in others. Everything now uses legal@xavorian.com. Appoint a named data protection contact when you can.
- Arbitration: the Terms now say nobody must arbitrate unless they separately agree in writing. This follows her wording, which made arbitration conditional. If you want mandatory arbitration, that needs a different clause.
- Cities: the directory said "Operational Footprint" for Lagos, Abuja, Benin City and Port Harcourt while you are still pre-launch. It now says "Launch Focus (pre-launch)".
- Terms and Conditions vs Terms of Service: the two PDFs had the same text under two names. Use one title, "Terms of Service", on the site and retire or redirect the other.

TERMS OF SERVICE

Her 30 edits are applied, with your cap in 12.2. Version is now 2.1. Extra fixes I made:

- 1.2: removed the line saying the Terms are not read against Xavorian. It is one-sided and risky in consumer terms.
- 3.4: users are not liable for account use caused by Xavorian’s own security failure.
- 5.3: Xavorian no longer says it can "reverse" payouts, since it says it never holds money. It can ask the payment processor to.
- 5.6, 6.3, 11.2: added exceptions so they match the softer 5.4, 8.4 and 14.1.
- 9.6: honest reports that turn out wrong are not a breach, and "ought to know" was removed.
- 10.3: no longer says all off-platform loss is "entirely yours".
- 12.4: removed founder protection and "fails of its essential purpose", which clashed with 12.8.
- 14.2: closing an account does not affect data rights.
- 15.3: added that nobody must arbitrate unless they separately agree in writing.
- 15.6: the "entire agreement" clause no longer excludes liability for fraud. Guides and FAQs are marked as general information.
- 15.7: changes do not affect accrued rights or disputes already raised, and fresh consent is sought where the law requires it.
- 15.11: processor and partner failures only count as force majeure if Xavorian could not have prevented them.
- 15.14: replaced the undefined "Indemnified Persons".

- Cover box rewritten to match. Removed the tagline from this legal document and fixed the 7.6 email.

DISCLAIMER

- Removed the "₦50k Cap" heading and the blanket "not liable for scams" line. Now fault-based and matches Terms 8.4 and 12.2.
- The cap is described as in Terms 12.2, with your 70% and ₦50,000 figures.
- Fixed the broken 2.1 and 2.2 headings, softened the "AI monitoring" wording, and aligned the 14-day notice for changes with the Terms.
- Added that the Terms prevail if there is a conflict. Replaced the Gmail address.

PRIVACY POLICY

- Changed "Compliant" in the title to "Framework", since you are pre-launch.
- Highlights no longer overclaim: breach notice is "where the law requires", liveness deletion has the legal exception, hashes are no longer called irreversible.
- Section 17 pointed to timeframes that did not exist. Section 13 now gives 30 days.
- Replaced "secure payment" wording, which could suggest you hold funds, with "payment facilitation".
- Policy changes: fresh consent is asked for where the law needs it. "Terms and Conditions" is now "Terms of Service". Gmail replaced.

FAQ

- Waitlist: it said "one email, nothing in between", which clashed with the Privacy Policy. Now says launch email plus occasional updates, with unsubscribe.
- Removed "guarantees you hear" and "never publishes". No launch date is promised.
- Liability answer is now fault-based and says nothing limits legal rights.
- Data answer adds legal retention. Support replies are now "aim to" rather than a promise.

SERVICES AND HOW IT WORKS

- Removed "Guaranteed Direct Account Match", "Zero exceptions", "never make it onto the platform", "neutralized" and "eliminates blind spots". These could be quoted against you.
- Gate 1 now allows human review, matching the FAQ and Privacy Policy. Gate 4 mentions human review of flagged cases.
- Renamed "Autonomous Verification Seal" to "Verified Badge" and "Protected Inspections" to "Inspections". Added a note that verification is not an assurance.

GUIDES, SEVEN QUESTIONS, VISION

- Guides: "never pay an inspection fee" is now "be very careful", since some agents charge lawfully. Removed lines that could read as defaming agents. Added a "not legal advice" note.
- Vision: removed "eliminating human bias and corruption", "deterministic checks" and "eradication of the syndicate". Tier 1 is "at launch", and later tiers are plans.
- These marketing documents keep the tagline. It is removed only from the Terms, Disclaimer and Privacy Policy.

This is a plain-language review, not legal advice. Have a Nigerian lawyer review the final text before publishing.
