OPERATIONAL ARCHITECTURE • SERVICES & VERIFICATION BLUEPRINT

XAVORIAN SERVICES AND HOW IT WORKS

Four Gates That Help Keep Scams Off the Platform | Edition: Pre-Launch Blueprint | Territory: Nigeria

PLATFORM OPERATIONAL MANIFESTO

Every Xavorian listing must pass identity verification, bank-account matching, a document audit with AI assistance, and an automated multi-layer check before it goes live.

In a market where forged paper and untraceable strangers are common, Xavorian builds structured, automated accountability: payments made through the platform are routed only to verified account holders, and listings that fail verification are not published.

Verification is not an optional premium feature. It is the baseline for every listing and user on the platform.

Verification is a process, not an assurance. It reduces risk but cannot remove it, so you must still do your own due diligence (see Terms of Service, Sections 4 and 8).

1. THE FOUR VERIFICATION GATES

Gate 1: Identity & Liveness KYC Check

What Happens: The seller or agent uploads a government-issued ID (NIN card, international passport, driver's licence, or voter's card) and completes a real-time biometric liveness check. The legal name, the live face, and the document must belong to one real, reachable person.

Why It Matters: Many property scams in Nigeria begin with an untraceable stranger using a burner SIM card. When verified identity is required to list, it is much harder for bad actors to disappear.

Failure Protocol: The account cannot publish listings until identity is verified. A person who fails can request human review.

Gate 2: Bank-Account Name Match Rule

What Happens: The seller or agent links the bank account that will receive payments. The account name verified by NIBSS / CBN-licensed processors must match the verified ID.

Why It Matters: A common property scam is asking seekers to pay "the oga", "the family head", or "the caretaker" into a third-party account. The Bank-Name-Match Rule blocks this for payments made through Xavorian.

Failure Protocol: The listing stays offline until the account matches. Payments made through Xavorian go only to the account name matching the verified identity on the title or authorised mandate.

Gate 3: Title Document Scan & AI Truthing Assist

What Happens: Certificates of Occupancy (C of O), Deeds of Assignment, Governor's Consent, Survey Plans, and purchase receipts are scanned and audited. Our AI assist reads registration numbers, beacon coordinates, and survey stamps, and compares them with the claims on the listing.

Why It Matters: Forged documents can look convincing on a mobile phone screen. Automated cross-checks help catch discrepancies, false beacon numbers, and unsupported claims that a quick glance can miss.

Failure Protocol: The listing is paused until the discrepancy is cleared or removed. Accounts that repeatedly submit fraudulent documents may be banned and referred to the authorities.

Gate 4: Automated Multi-Layer Verification Audit

What Happens: Our automated verification system cross-checks identity, bank account details, and document records before publication, and flags anything inconsistent for human review.

Why It Matters: Automated checks reduce blind spots and inconsistency. They are not perfect, which is why flagged cases go to a person.

Failure Protocol: The listing stays offline until the issue is cleared.

2. USER OPERATIONAL PATHS

2.1 The Seeker & Buyer Journey

- Verified Listings: Browse property listings that have passed all four verification gates before publication.
- Inspections: Verified listings reduce risk, but you should still inspect the property in person and bring someone with you.
- Direct Account Match: Payments made through Xavorian go only to a verified bank account whose registered name matches the verified seller or authorised agent.
- No Buyer Fees: Browsing and enquiring on verified listings is free for property seekers.

2.2 The Agent & Landlord Accreditation Journey

- KYC Onboarding: Complete mandatory government ID and live biometric liveness verification.
- Bank Verification: Link the corporate or individual bank account registered in the exact same legal name.
- Document Submission: Upload legitimate title documents, survey plans, and mandates for each property.
- Verified Badge: Pass the multi-layer audit to earn the verified badge and stand out in the marketplace.

3. HOW XAVORIAN ADDRESSES COMMON SCAMS

The Vanishing Agent

The Scam: An anonymous caller takes an inspection fee or deposit and shuts off the phone line.

How Xavorian helps: Gate 1 (KYC) and Gate 2 (Bank-Name Match) make agents identifiable and traceable. Agents are verified against official identity references and verifiable bank records.

The Account Switch

The Scam: The agent shows a genuine property but instructs payment into “my secretary’s” or “the developer’s personal” account.

How Xavorian helps: The Bank-Name-Match Rule reduces this risk. Payments made through Paystack go only to verified accounts matching the title or legal mandate. Never pay a differently named account.

The Beautiful Forgery

The Scam: A perfectly printed C of O or Deed of Assignment with fabricated registration numbers or false survey coordinates.

How Xavorian helps: Gate 3 uses AI assist and registry checks to compare registration numbers, beacon bearings, and survey stamps with the listing claims. No automated check is perfect, so have a property lawyer search the registry before you pay.

The Cloned Listing

The Scam: A scammer copies photos and descriptions of another agent's genuine listing and posts them at a discounted price.

How Xavorian helps: Gates 3 and 4 require verified title ownership documents before publication, which makes photo cloning much harder.

Xavorian is a marketplace and screening tool. It is not an insurer or a guarantor of any user, listing, document, or transaction. See the Terms of Service and Disclaimer.

Official Contact & Notices Directory

Entity: Xavorian Technology Company (RC-9912416), incorporated in the Federal Republic of Nigeria
Founder: Ezeani Chukwuebuka
Legal & Privacy Notices: legal@xavorian.com | Support: support@xavorian.com
Telephone / WhatsApp: +234 805 637 3583 | Website: https://xavorian.com
Launch Focus (pre-launch): Lagos, Abuja, Benin City, Port Harcourt, and expanding across Nigeria.

Trust is not a feature. It is the product.
